

GULSHAN MEHRA

Unity Game Developer

Unity Game Developer with 3+ years of experience building production-ready games, gameplay mechanics, user interfaces, and interactive features using C# and Unity3D. Delivered commercial applications for international clients including Animoca Brands and Cuddle Cubbies, with hands-on experience across mobile, standalone, WebGL, and multiplayer platforms. Proven ability to optimise rendering performance, publish Unity Asset Store packages, and integrate complex systems including blockchain, REST APIs, and custom shader-based VFX.

CORE SKILLS

Languages: C#, .NET, HLSL/ Shader Graph, Python, PHP

Core Concepts: Object-Oriented Design & Development, Data Structures & Algorithms, Design Patterns, Event-Driven Programming, State Management

Game Engines: Unity3D (2019+), Unity2D, Shader Graph

Game Development: Gameplay Mechanics, Multiplayer Networking (Photon Fusion, Mirror), Object Pooling, Input Systems, UI/UX Integration, Animation, VFX, Editor Tooling, Unity Asset Store Publishing

Platforms: Android, Standalone (Windows/Mac), WebGL, Mobile

Tools & Libraries: DoTween, TextMeshPro, Newtonsoft.Json, Photon Fusion, Mirror

SDKs: Firebase, AdMob, Google Play Games, Unity Ads

Backend & Data: REST APIs (UnityWebRequest), PHP, MySQL, AWS S3, Blockchain Integration, FastAPI, PostgreSQL, Qdrant, JSON/XML

Version Control: Git, GitHub, GitLab

Methodologies: Agile, Scrum, SDLC

PROFESSIONAL EXPERIENCE

Unity Software Engineer

Chicmic — Mohali

09/2023 – Present

- Developed and maintained 8+ scalable Unity 3D applications using modular architectures and clean C# OOP practices; collaborated with product and design teams to translate requirements into maintainable, well-documented code.
- Implemented Classic Input Manager & New Input System with full keyboard, joystick, and controller-based UI navigation across Console, Standalone, and Mobile builds.
- Performed debugging, root cause analysis, and performance/memory profiling, reducing execution latency by 30%; wrote unit tests, collaborated with QA teams to ensure the delivery of bug-free, high-quality software, and participated in code reviews to give and receive constructive feedback on code quality and design.
- Designed responsive UI systems using TextMeshPro & DoTween; utilised StreamingAssets for runtime data loading and built custom Editor tools to accelerate team workflows.
- Analysed and optimised draw calls and batches for smooth mobile gameplay; performed Profiler-driven debugging and frame analysis across WebGL, Standalone, and Mobile builds.
- Delivered commercial games and applications for international clients including Animoca Brands and Cuddle Cubbies.

Unity 3D Developer

OffsureIT — Mohali

09/2022 – 09/2023

- Delivered Unity 3D applications for Android & Standalone platforms using structured, reusable systems and clean code practices.
- Implemented gameplay logic, input mapping, and UI navigation flows; created procedural shaders including water materials and blur effects using Shader Graph.
- Debugged device-specific issues and collaborated with the team using Git and Agile workflows.

COMMERCIAL PROJECTS

ColorFolks | Unity, C#, Photon Fusion, Shader Graph

- Multiplayer hide-and-seek game where players paint their character with colours and broadcast paint patterns to all connected players in real time; hunters identify hiders by colour.
- Implemented host-authoritative networking with Photon Fusion, real-time shader-based paint broadcasting, and draw-call / batching optimisation for smooth mobile performance.

VR Engine Explorer | Unity, C#, XR Plugin, Git

- An interactive Meta Quest 2 VR experience enabling users to inspect a car engine in real-time operation. Users can interact via controllers or hand tracking, toggle open, closed, and running states, and grab individual parts to inspect dynamic details.

UNO Five | Unity, C#, AWS S3, Git

- A multiplayer Android UNO card game built with Photon PUN 2. Features 2v2 team modes, dynamic turn-based gameplay, social systems with in-game chat and gifting, friend lobbies, and competitive daily and weekly tournaments for global players.

Modern Closet | Unity, C#, PHP, MySQL, Git

- Fashion/wardrobe management app delivered for Cuddle Cubbies; PHP/MySQL backend powers user accounts, inventory, and item management.

ASAP Arcade | Unity, C#, Git

- Commercial arcade game collection; handled full development lifecycle from gameplay mechanics through testing and delivery.

Water Shader Pack | Unity, Shader Graph, HLSL [Published — Unity Asset Store]

- Production-ready water shader package built with Shader Graph and custom HLSL; published on the Unity Asset Store for use by the wider Unity community.

Grass Shader Pack | Unity, Shader Graph, HLSL, Editor Tooling [Published — Unity Asset Store]

- Grass shader package featuring a custom Unity Editor tool for mesh combining, object painting, and a terrain-system-like painting workflow — all built with Shader Graph and custom HLSL.

PERSONAL PROJECTS

RAG Document Q&A System | Python, FastAPI, Qdrant, PostgreSQL, Qwen 2.5 7B (Local LLM)

- Full-stack Retrieval-Augmented Generation system running a local Qwen 2.5 7B language model; users can register, log in, upload documents, and ask contextual questions.
- Vector search powered by Qdrant; PostgreSQL manages user accounts and session data; exposed via a FastAPI REST layer.

CERTIFICATIONS

- The Most Comprehensive Guide To Unity Game Development
- Visual Effects for Games in Unity – Beginner To Intermediate
- Master Python For Competitive Coding

EDUCATION

Punjab Technical University (PTU)

Bachelor of Technology in Computer Science | Aug 2019 – May 2023 | CGPA: 8.2 / 10
Mohali, Punjab
